

WELCOME TO GNIEZNO

Gniezno, as the first capital of Poland and the town of St. Adalbert, represents not only a symbol of European reconciliation and dialogue; it is also a place dear to every Pole.

A trip to the first capital of Poland involves an excursion into the historical and cultural past of the country, to the time when the state of Poland was born. According to the Piast legend, Gniezno was erected in the place signified to Lech, a brother of Czech and Rus, by a white eagle in the area where it formed its nest.

It was just in Gniezno that one of the most important events in our history took place, the baptism of the Piast prince, Mieszko the First, in the year 966. This historical moment made Gniezno a very important centre of Christianity, which was symbolized by the establishment of the first Bishopric.

The arrival of the Prague bishop Adalbert, his Christianizing mission in Prussia and martyr's death gave beginning to the cult of St. Adalbert, which up to now unites and attracts to Gniezno pilgrims from the entire Europe.

This historical meeting provide contemporary Gniezno with the guiding principle for the international meetings of leaders of European countries which take place in Gniezno, a symbol of a united and solidary Europe.
